

# E&TIS

Engineering Consultants

# About Us

The genesis of E&TIS was driven by an inspiration to create new benchmarks in MEP training Kerala. Building services domain is in constant need of qualified professionals conversant with the intricacies of HVAC, fire systems and other relevant segments. Most mechanical and electrical engineering graduates lack in hands-on experience on pragmatic application of theories learnt. Our MEP training Ernakulam centre is manned by seasoned engineering professionals who possess the expertise and foresight needed for equipping aspirants with valuable practical techniques that are compulsory for landing lucrative jobs. We further the career path of engineering and diploma holders by offering them focused and relevant training on HVAC/ Electrical/ Fire System/ Plumbing/ Revit design and draft technologies as well quality assurance, SEO, IT and other germane areas.

## Our Mission

To align the academic expertise of learners with industry dictated demands for highly specialized mechanical, electrical and other fields vide focused and pragmatic MEP training that adheres to international standards.

## About the Industry

MEP Industry is expanding at a rapid pace. The demand for skilled manpower that is well-acquainted with building related technical activities is also surging. Building services industry pins its hopes for sourcing competent manpower from ace institutes like E&TIS which imparts innovative and experiential learning opportunities to aspirants.

MEP training Kerala intends to fill the vacuum that has engulfed the industry in recent times. Despite an epic rise in demand for proficient professionals, there is alarming scarcity of individuals who can efficiently plan and carry out critical designing and drafting activities pertaining to HVAC, air conditioning, fire fighting, Revit modelling and plumbing. All of the aforesaid are highly specialized industry jobs that can be executed with safety and impeccability by individuals subjected to superior quality mentoring as offered by MEP training Ernakulam.

MEP industry is a booming sector which offers adequately trained engineering degree and diploma holders' lucrative career prospects. The activities of the industry are guided by stringent standards, norms, and formulas that have to be strictly adhered to. Any deviation or amateurish activity can invite serious trouble. As such, the industry relies on professionals who have been subjected to value based training from top notch engineering veterans from ace institutes known for superlative skill enhancement. MEP training Kochi is one such centre operated by E&TIS that conforms to the standards prescribed by the industry. The well-facilitated lab infrastructure and project oriented training reinforce the candidates' fundamental and pragmatic knowledge about the various activities of building services and render them fit to serve the industry. Apart from the core competencies, the industry also seeks the services of the professionals in the domains of quality assurance, search engine optimization, IT, non-destructive testing, welding and piping inspection etc. The industry has a long way to go and the need for professionals with analytical approach to job would experience sustained momentum.

We have sophisticated infrastructure and helpful resources available at our training centres which the learners can avail of to strengthen their concepts. All our training programs are approved by ISO 9001 accredited bodies and are recognized by industries. Our emphasis is on optimally preparing learners for future challenges so that they can qualify for attractive jobs in onshore and offshore destinations. Our training methodologies are considered as hallmarks in the domains of MEP i.e. Mechanical, Electrical and Plumbing. We are committed to offer the highest standards of academic and practical know-how to learners to render them compatible to the requirements of contemporary industrial scenario. MEP training Kochi is best in class in terms of securing highly paying and promising jobs for prospective candidates.

## Our Vision

To foster an innovative learning culture in the field of MEP and allied segments through industry relevant and technically superior training opportunities that matches the aspirations of proficient professionals with attractive career growth avenues.

# Courses

## **MEP(Mechanical Electrical Plumbing)**

- HVAC Designing and Drafting
- Electrical Designing and Drafting
- Plumbing System Designing and Drafting
- Fire Protection System Designing and Drafting

## **Revit MEP**

- MEP Basics + Revit

## **Mechanical QA/QC**

- QA/QC Welding Inspection
- QA/AC Piping Inspection
- Diploma in QA/QC Welding & Piping Inspection

## **NDT (Non Destructive Testing)**

- RT-Radiographic Testing
- UT-Ultrasonic Testing
- PT-Liquid Penetrant Testing
- MT-Magnetic Particle Testing

## **SEO–Search Engine Optimization**

- Basic SEO & SEM
- On Page Optimization
- Off Page Optimization
- Keyword Assessment
- Google Analytics
- Google AdWords

## **Digital Marketing**

- Social Media
- SEO Training
- SEM Training
- SMO Training
- Email Marketing
- Google Analytics

## **Software Testing**

# Our Specialities

- Faculties with industrial experience
- Project oriented training
- Mock interview
- Guideline classes from working professionals
- Site visits
- 100% placement assistance
